

WaterWise Irrigation Workshop

What to do during the drought.

Get to Know Your Sprinkler System!

Saturday, March 31 • 9 a.m. to 2 p.m. • Texas AgriLife Center • 17360 Coit Rd. Dallas

Like most things, your irrigation system needs maintenance and since spring is just around the corner, now is a great time to ensure that your irrigation system is operating at peak efficiency. Outdoor watering accounts for up to 60% of water use in the spring and summer and this **FREE** workshop will help you make sure your system won't waste a single drop.

The WaterWise Irrigation Workshop is a hands-on, interactive event where you can go to educational stations at your own pace to see first-hand how an irrigation system works.

Stations will demonstrate how to conduct a sprinkler check-up, schedule and operate their irrigation controller, install drip irrigation to water trees and foundations and much more. Information will also be provided on plant selection for a water conserving landscape, rain water harvesting and city representatives will be on hand to discuss water conservation measures, rebate programs and current watering restrictions.

Presented by:

AgriLife Research and Extension • City of Allen • City of Dallas • City of Frisco • City of McKinney • City of Plano
City of Richardson • Dallas Irrigation Association • EPA WaterSense • Ewing Irrigation • Hunter • Netafim
Rain Bird • Toro/Irritrol • Weathermatic

**Visiting each of the six stations listed will
take about an hour.**

Station 1 How your Irrigation System Works

Station 2 Simple and Easy Repairs

Station 3 The importance of Water Pressure and
Sprinkler Performance

Station 4 Distribution Uniformity - Preventing
Dry Spots in your Landscape

Station 5 Conducting a Sprinkler Check-up

Station 6 Education Building demonstrations
Setting your Controller • DIY – Drip Irrigation
Conversion • AgriLife: Ask a Specialist •
Irrigation Manufacturer Exhibits – Latest and
Greatest Technologies • Water Conservation
Made Easy Video Series– Playing in the Theater

Bonus: Rain Water Harvesting demonstrations!
